Introduction

- AIM
- OUTLINE
- General Introductory Comments

Political and SACEUR Direction and Guidance Highlights

CJOPG**No Change**

POLITICAL HIGHLIGHTS

1. NATO operations to be conducted within the constraints of international law.
2. Operations will be planned and carried out under NATO command and control in close cooperation with host nations and international organizations operating in the region.
3. Operations in the Malacca area will comply with the provisions of UN-recognized treaties.
4. NATO ROE in the territories and territorial waters of Indonesia, Malaysia, and Singapore, as well as the international waters of the Malacca Straits.
5. NRF will be tailored for specific operations to provide a rapid response to pre-empt further escalation and contain the crisis.
6. FOF may be required for more robust operations to fully contain the crisis and prevent conflict, organised within the framework of the Combined Joint Task Force (CJTF).

SACEUR HIGHLIGHTS

1. Restore international peace and security in the Malacca Strait region.
2. MIL OPS integrated with DIME
3. ME establish durable stability in Indonesia and the Malacca Strait region.
4. limitations include restrictions on forward staging of NATO forces, pre-emptive actions requiring NAC approval, respect for neutral nations' territorial integrity, and limitations on troop deployment.
5. Co-op with UN IOT address ethnic violence.
6. DEPLOY FRCES to JOA to DETER further aggression and assist GoInd in RESTORING territorial integrity

Commanders OPG Highlights

Higher Direction

NATO End State

1. Est SASE
2. Prevent escalation of conflict to other areas.
3. Safety of citizens from NATO member states.
4. Natural Energy Resources secured

Strategic Non-Military Obj

1. **Economic Engagement:** Assisting the Indonesian economy, particularly in the area of oil and gas enterprises.
2. **Political Engagement:** Facilitating political solutions in Indonesia to stabilise the region.
3. **Civil Engagement:** Ending the humanitarian crisis in Indonesia.

Commander's OPG Highlights

- **MISSION:**

CJTF will **DEPLOY** to Sumatra IOT **DETER** IRS and adversaries.

Will **PARTNER** with GoIND to **DETER** and **DEFEAT** external aggression and **DISRUPT** IRS operations from D-Day.

Will **SUPPORT** IND in restoring internal security and provide FOM for IC and HA.

CJTF ICCW GoIND will **STABLISE** the Malacca Strait area IOT est FON.

Initial Commander's Intent

CJOPG

It is my intent is to restore international peace and security in the Malacca Strait region to prevent an escalation and widening of the conflict. Therefore, IOT achieve this, the NRF will deploy to S SUMATRA NST 30 APRIL 2024. The NRF will liaise with INDO Forces to **DEVELOP** conditions to prepare for the deployment of CJTF.

The CJTF will consider operations ICCW NRF and Indo forces to **SEIZE** and **HOLD** APOD and SPOD in IRS controlled area allowing break out operation to **DEFEAT** IRS forces in N Sumatra and **RESTORE** Gov of Indo control over the entire area of Sumatra.

A robust STRATCOM campaign will be utilised to support our forces prior, during and post operations.

Operational CoG

No Change

CJOPG

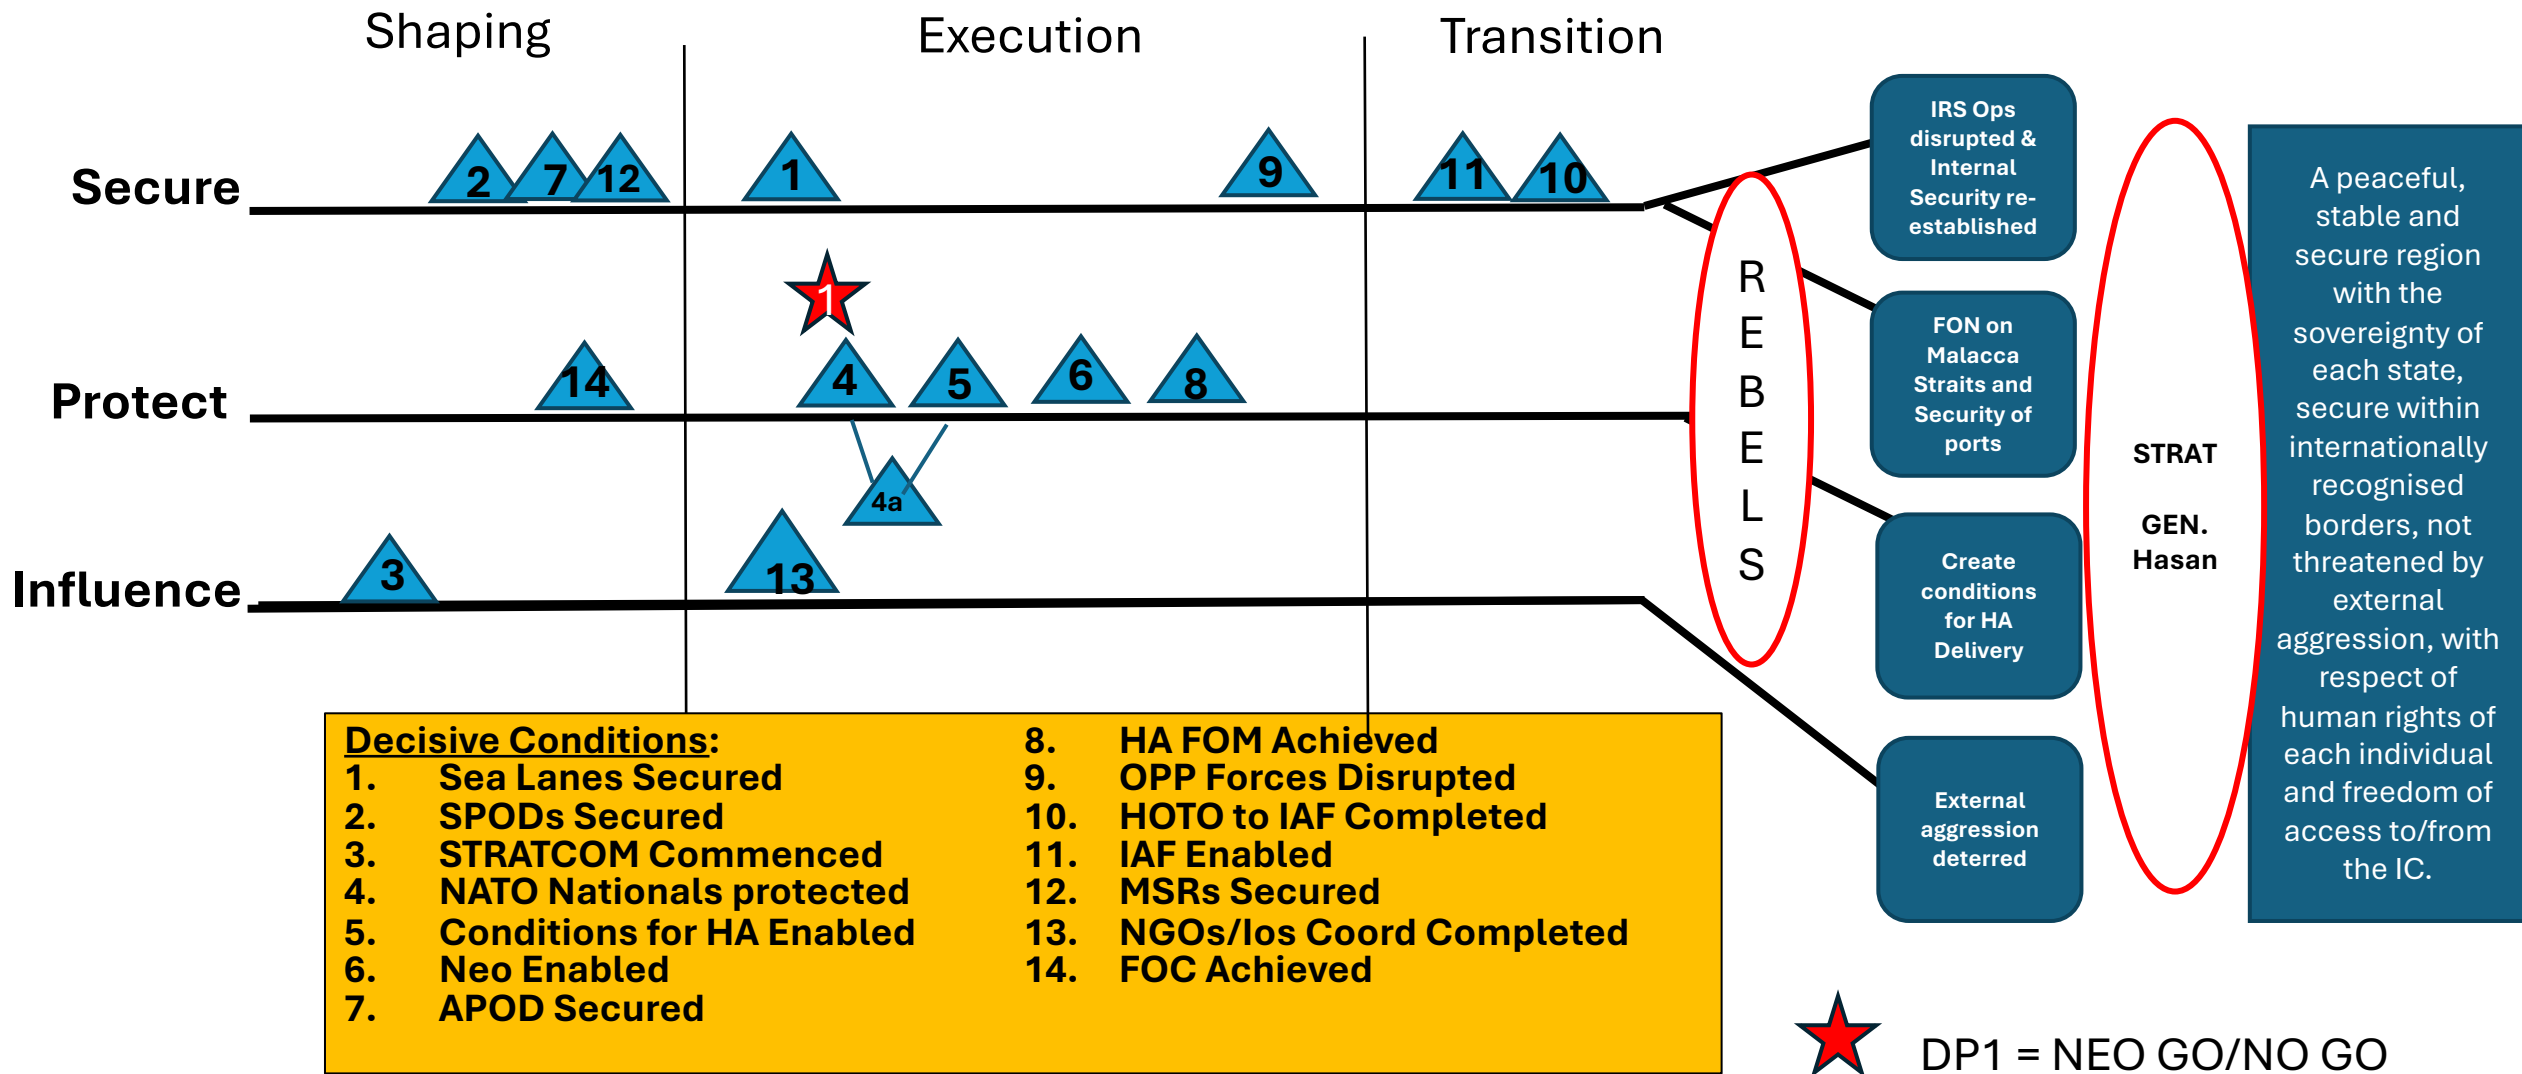

Objective: Deter IRS, assist in the restoration of internal security, enable FoN for Malacca Straits and create the conditions for NEO.

COG: Combined Joint Task Force	Critical Capabilities (ability to....) 1. Deploy a JTF/Land Force 2. Deter/Defeat OpFor 3. Secure SLOCs/APODs 4. Enable NEO Ops 5. Operate alongside IOs/NGOs 6. Conduct Influence Ops
Critical Vulnerabilities 1.1.1 Rugged terrain & effects of Wx 1.1.2 Submarine capability of OpFor 2.1.1 Complexities of our own C2 3.1.1 Piracy 5.1.1 Conditions for HA not present 6.1.1 Disinformation 6.1.2 Cyber capability of OpFor	Critical Requirements 1.1 Naval Component 1.2 Effective C2 1.3 Amphibious Force 1.4 Land Force 2.1 Sufficient Combat Power 3.1 Sufficient Naval Capability 3.2 Sustainment of Forces 5.1 Liaison teams 6.1 PSYOPS Teams

Operational Design

No Change

CJOPG

Situation Analysis

- NO changes in the situation with operational impact on potential COAs (Opposing and Own).

a. General Description:

IRS will use multidomain rebel forces and KODAM1 to achieve operational OBJs. IRS will seek to consolidate gains and reconstitute prior to expansion operation into ACEH. IO focus on delegitimising intervention forces and supporting IRS government.

SUNDA Strait will be closed to force trade to MALACCA, which will be harassed from pirates/coastal missiles to highlight IND inability to control claimed TW. ATKs across MDO will increase as coalition intervention grows; ATKs on PODs and coalition forces from ISIL/AQ will be used to provide deniability (once utility is lost, they will overtly ATK).

ACEH Loyalists and GAM Rebels will be subject to an influence campaign to remain neutral towards IRS and JTF focusing on four pillars: Control of own areas, logistics support, control of own ports and financing.

NATO civilians and foreigners will enjoy FOM so that IRS show legitimacy and are NOT seen as an aggressor in the eyes of the IC. ATKs on CI, Trade, and Coalition Forces will focus on breaking political will in IND and the IC to compel coalition governments to withdraw and concede to IRS claims. Violence will deescalate in the Straits of Malacca and Sumatra as concessions are made. End state finds international recognition for IRS Gov.

b. Potential Operational Timeline

SHAPE	EXPAND	RESIST	STABILIZE	RECOGNITION
Month 1 & 2	Months 3 & 4	Months 5 & 6	Month 7	Month 8+

c. Analysis

Advantages:

- Seizure & Retention of Initiative,
- Geography; KODAM 1 already possesses >50% Northern SUMATRA and MEDAN,
- Usage of capable proxy forces (deniability), Coastal defence cruise missiles (ATK), Naval piracy ops w/plausible deniability.

Disadvantages:

- Geography
- Potential for other Actor Defection, Al-Qaeda/IRS relationship is one of convenience/pragmatism
- SLOCs & LOCs vulnerable to interdiction
- Potential weaknesses in own C2.

d. Assessment of Opposing COAs:

NATO Opposition will most likely **DEPLOY rapidly, INFLUENCE, SHAPE & FIGHT.**

a. General Description:

IRS will disregard the requirement for legitimacy and international support and will implement a violent and bloody campaign of indiscriminate kinetic attacks. This can be seen as short-sightedness as they try to reverse gains made by the JTF.

IRS will use all available forces and allies to achieve operational OJBs. IRS will seek to **rapidly transition into offensive operations in ACEH**. IRS will seek to utilise the criminal networks, pirates, and any **assistance from NK/CHI** to destabilise coalition efforts to establish PODs, LOCs, and C2 (particularly EW/CYBER DoS attacks on C2 and harassment attacks on LOG infrastructure).

Heavy focus from IRS **expanding ties with ISIL/AQ** in order to build strong and long-lasting partnerships in Sumatra, with realised effects in the northern region. IO Campaign/Psyops will focus on **ACEH Loyalist/GAM Rebels against the intervening coalition**. Naval Forces will close Sunda Strait and allow disruption attacks in Malacca Strait, as per MLCOA. Significant guerilla warfare used to create Coalition MASCAL events as often as able. HVTs will be more frequently exposed IOT deny coalition Air/Sea capability with the aim of preventing FOC.

GAM Rebels will be influenced to remain neutral. ACEH Loyalists and supporters will be coerced/threatened with retaliation from ISIL/AQ/JI to join the IRS cause.

ATKs on CI, Trade, and Coalition Forces will escalate in frequency and audaciousness as objectives are NOT met and remain focused on breaking political will in IND and the IC to compel Coalition Govs to withdraw and concede to IRS claims. If OJBs are rapidly deteriorating, IRS will seek to expand to **overt attacks on trade, oil/gas infrastructure, and ethnic minority population. NATO civilians and foreigners will be kidnapped and held hostage IOT compel NATO to avoid direct action**. Violence will deescalate in the Straits of Malacca and Sumatra as concessions are made. End State finds international recognition for IRS Gov.

b. Potential Operational Timeline

SHAPE	EXPAND	RESIST	STABILIZE	RECOGNITION
Month 1	Month 2	Month 3	Month 4	Month 4+

c. Analysis

Advantages:

- Effective disruption of coalition efforts,
- Strong partnerships with terrorist groups; ISIL/AQ
- Mass casualty of Coalition Forces; fear, disruption, lost C2.

Disadvantages:

- Escalation of violence & international condemnation; may affect legitimacy.
- Loss of Support from Ethnic Minority Populations.

d. Assessment of Opposing (NATO) COAs:

OPFOR (NATO) will most likely **DEPLOY rapidly and gain some initial success, however the mass of asymmetric attacks and a deterioration in the situation will likely lead to a breakage in political will of coalition member nations.**

Own Forces COAs

6a. Common Points Applicable to all CoAs

1. Emphasis on early INFLUENCE (STRATCOM)
2. Emphasis on "Cohesion"
3. CoG "CJTF"
4. Rapid deployment of NRF as part of the CJTF
5. Objectives are assessed to be met by both CoA
6. Both CoAs satisfy FACES test

Own Forces COA1

COA1:

Rapidly deploy NRF (Maritime Force) to ensure FoN in the Malacca and Sumatra Straits. This will ensure that SLOC's remain unaffected. A specialist Land Force will be deployed to enable the IND Forces to achieve SASE through the provision of training and military advice. A significant INFO/PSYOPS Campaign IOT deter the OPFOR and to reassure the population. NATO will provide humanitarian assistance through the provision of supplies and advice.

COA 1 – LIGHT

COA1: Rapidly deploy NRF (Maritime Force) to ensure FoN in the Malacca and Sumatra Straits. This will ensure that SLOC's remain unaffected. A specialist Land Force will be deployed to enable the IND Forces to achieve SASE through the provision of training and military advice. A significant INFO/PSYOPS Campaign IOT deter the OPFOR and to reassure the population. NATO will provide humanitarian assistance through the provision of supplies and advice.

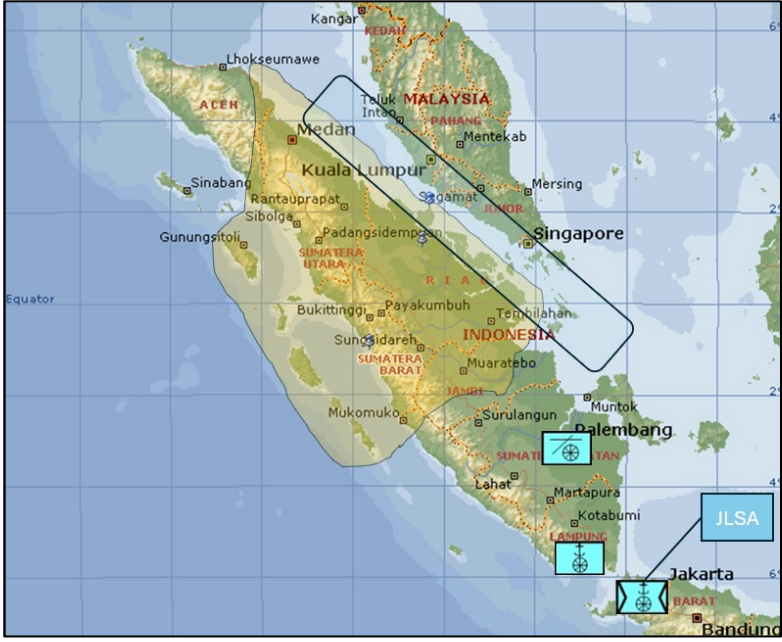

Mission

CJTF will deploy IOT deter OPFOR and assist IND to reestablish internal security. CJTF will ensure FoN in the Malacca Strait area as well as setting the conditions for NEO.

Operational Narrative

We will rapidly deploy a credible and cohesive Joint Force to the JOA IOT to enable IND to deter OPFOR from destabilizing the region. This in turn will assist the GoI in the restoration of internal security and stability. Our overt Maritime presence in the Malacca Straits area will ensure that critical international SLOCs remain open and unimpeded, therefore ensuring Global Trade is unaffected. A priority is the safety and security of NATO nationals and NEO will be enabled through the Host Nation. Humanitarian Assistance is a critical factor for the population of Indonesia and all efforts will be made to ensure this work continues through NATO support of the Host Nation. **Key to our overall plan is our information/PSYOPS campaign targeting both OPFOR and the local populus. Particular focus will be to target the C2 element of the OPFOR.**

Map and Overlays

Scheme of Manoeuvre

Phase 1. Shaping – Commence Info Campaign, targeting local population/GAM/ACEH/PRC. Offensive PsyOps to target OPFOR. Enable IND Forces to secure SPOD/APOD/MSR.
Phase 2. Execution – NATO to secure SLOC. Through training, IND Forces deter OPFOR. Conditions for HA/NEO enabled through NATO support to Host Nation.
Phase 3. Transition – IND Forces enabled to provide SASE.

COA Risks and Mitigation

1. Terror Activities – Offensive PSYOPS, strategic targeting of Terrorist Camp.
2. Collapse of Gov – STRATCOM campaign, enablement LSF
3. Sustainment – Early secure SPODs/APODs, Host Nation support

Assumptions:

1. Tension with CHI will not increase
2. Partner Nations cooperative
3. Host Nation will secure their area
4. IND Forces will be FOC.

CCIRs

1. NEO capability
2. Stratlift assets available

Deployment & Sustain

Robust, scalable Log concept deployed with NRF. 6+ months Deployment. Role 3 Med & 3rd Line Logs off Island of Sumatra. 2nd Line near SPOD/APODS. 1st Line dynamic.

Phase 3

- **SASE (IND Forces)**
- **MALACCA STRAITS Secured**
- **NATO Withdrawal**

Scheme of Manoeuvre - Light

Phase 1 – Shape (1 month)	Phase 2 – Execution (4 months)	Phase 3 – Transition (1month)
SPOD/APOD/MSR Secured By HN – enablement provided by NATO to achieve.	SLOC Secured – NATO maritime presence in Malacca Strait area to deter acts of aggression/Piracy and enable FoN.	IND Forces trained and enabled to achieve SASE
Launch Influence Campaign – to influence local populus to NATO assistance. Promote Gol credibility.	NATO MTT – train IND Forces (focus on C2, COIN)	OPFOR deterred from operating in Malacca Straits – Territorial Waters security maintained
Offensive PsyOps to target OPFOR – focusing on C2 structure	Host Nation supported to achieve HA – focus on IDP's and maintaining LOCs.	NATO withdrawal
	Host Nation enabled to achieve conditions necessary for NEO – focus on NATO nationals	Transition to IC/IND

Own Forces COA2

Rapidly deploy a credible and cohesive Joint Force in the JOA IOT to deter and defeat the IRS and prevent escalation of the crisis; contribute to the protection of NATO citizens, and Support to HA/IO/NGO IOT to establish the NATO desired End State. Therefore, it will be crucial to establish a robust force posture, avoiding collateral damage. Focus on deliberate effort to SECURE the Area starting from, APOD/SPOD/MLOCS, extending our effort to Natural Resources and to the remaining area after. To the extent that the CJTF can swiftly take over the JOA.

COA 2 – Heavy

Mission

CJTF will deploy IOT DETER OPPFOR and ASSIST in IND to reestablish internal security. CJTF will ENSURE FON in the MALACCA STRAIT as well as setting the conditions for NEO.

Operational Narrative

It is my intent is to restore international peace and security in the Malacca Strait region to prevent escalation and widening of the conflict. Therefore, IOT achieve this, the NRF will deploy to S SUMATRA NLT 30 MAY 2024. The NRF will liaise with INDO Forces to DEVELOP conditions to prepare for the deployment of CJTF.

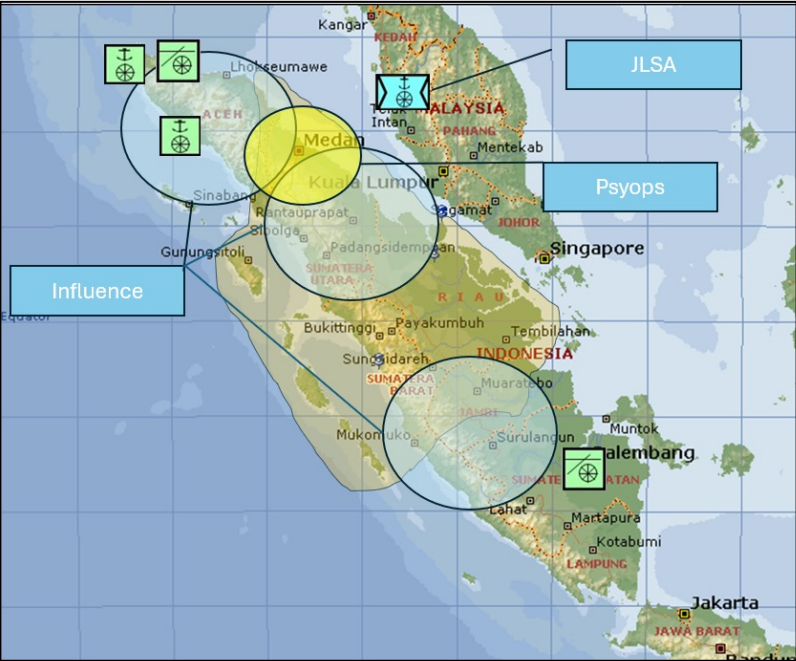

The CJTF will consider operations ICCW NRF and Indo forces to SEIZE and HOLD APOD and SPOD in IRS controlled area allowing break out operation to DEFEAT IRS forces in N Sumatra and RESTORE Gov of Indo control over the entire area of Sumatra.

Decisive Conditions

- 1. Sea Lanes Secured
- 2. SPODS Secured
- 3. Local Pop Influenced
- 4. NATO Nationals Protected
- 5. Conditions for HA Enabled
- 6. NEO Enabled
- 7. APOD Secured
- 8. HA FOM Achieved
- 9. OPP Forces Disrupted
- 10. HOTO to IAF Completed
- 11. IND AF Enabled
- 12. MSRs Secured
- 13. NGO/IOs Coordinated
- 14. HN FOC Enabled

COA2: Rapidly deploy a credible and cohesive Joint Force in the JOA IOT to deter and defeat the IRS and prevent escalation of the crisis; contribute to the protection of NATO citizens, and Support to HA/IO/NGO IOT to establish the NATO desired End State. Therefore, it will be crucial to establish a robust force posture, avoiding collateral damage. Focus on deliberate effort to SECURE the Area starting from, APOD/SPOD/MLOCS, extending our effort to Natural Resources and to the remaining area after. To the extent that the CJTF can swiftly take over the JOA.

Map and Overlays

Scheme of Manoeuvre

Phase 1. SPOD/APOD/MSR Secured By HN & in conjunction with NATO. NRF & CJTF BPT deploy. Launch Influence Campaign – to influence local populus to NATO assistance. Promote GoI credibility. Offensive PsyOps to target OPFOR – focusing on C2 structure.

Phase 2. SLOC Secured – NATO maritime presence in Malacca Strait area to deter acts of aggression/Piracy and enable FoN. Clear EN FoM from shore. Neutralise Rebel capability by striking training camps and SOF targeting of En leadership. HA FoM Achieved. NATO MSC gathered for NEO. OpFor Defeated.

Phase 3. IOT conduct a HOTO to IND.

COA Risk and Mitigation

- 1. Terror Activities
- 2. Collapse of Gov
- 3. Disinformation
- 4. Sustainment
- 5. Tropical Disease

Assumptions

NATO interoperability achieved for Coalition
Population will positively respond to resumption of GoI control of SUMATRA
Loyalist forces/GAM will allow/facilitate CJTF forces in ACEH
SPOD and APOD assets in ACEH are secured
All coalitions will allow basing and overflight
Successful transition from mech inf to light inf tactics
ISTAR will located En AA assets.

CCIRs

- 1. Maritime access to IND
- 2. Availability of Interpreters
- 3. Literacy of population for STRATCOMM
- 4. NEO Capability
- 5. Stratlift assets available

Deployment & Sustain

Robust, scalable Log concept deployed with NRF. 6+ months Deployment. Separate North (nlt CJTF arrival) and South (in support of IAF) Logs Constructs. Role 3 Med & 3rd Line Logs off Island of Sumatra. 2nd Line near SPOD/APODS. 1st Line dynamic.

Scheme of Manoeuvre - Heavy

Phase 1 – Shape (1 month)	Phase 2 – Execution (4 months)	Phase 3 – Transition (1 month)
SPOD/APOD/MSR Secured By HN & in conjunction with NATO. NRF & CJTF BPT deploy.	SLOC Secured – NATO maritime presence in Malacca Strait area to deter acts of aggression/Piracy and enable FoN. Clear EN FoM from shore.	IND Forces trained and enabled to achieve SASE.
Launch Influence Campaign – to influence local populus to NATO assistance. Promote Gol credibility.	Neutralise Rebel capability by striking training camps and SOF targeting of En leadership.	OPFOR deterred from operating in Malacca Straits – Territorial Waters security maintained. Piracy ring destroyed.
Offensive PsyOps to target OPFOR – focusing on C2 structure	HA FoM Achieved. NATO MSC gathered for NEO. En FoM denied.	
	OpFor Defeated.	Transition to IC/IND

COA1– STRATCOM Audience & Key Message

J5

Key Factors: Objective, Unity, Enablement, Economy of Force

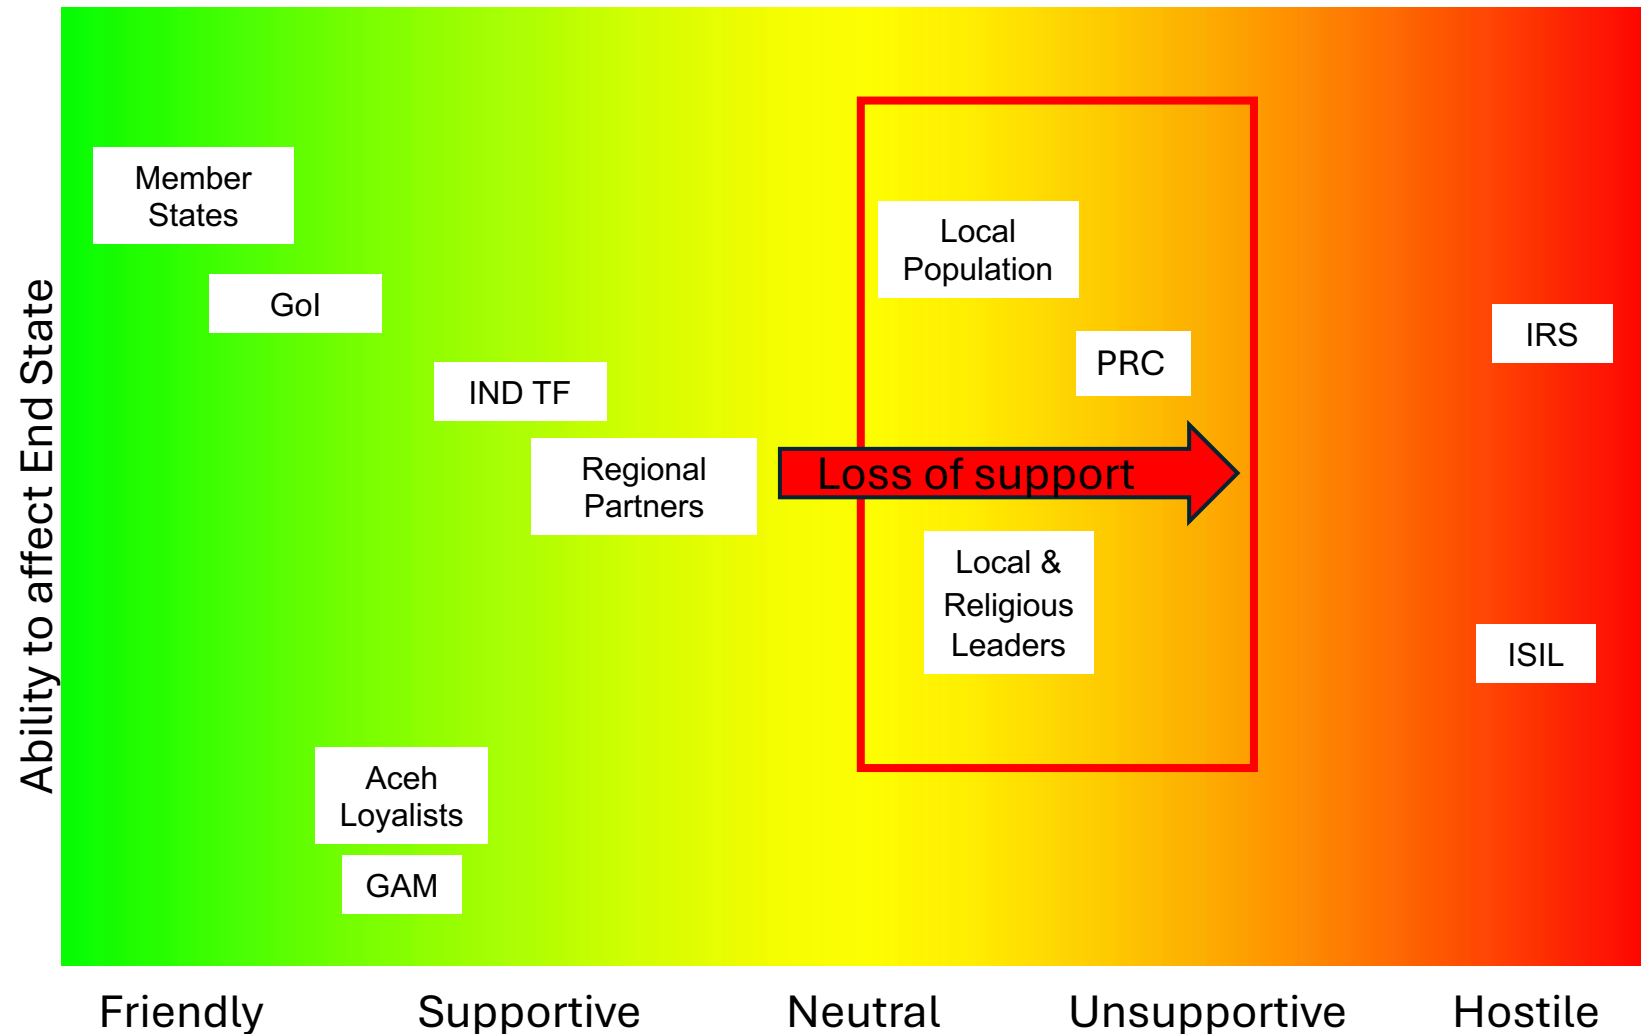

1. Coalition is here to support the Gol and the local population.
2. Gol and its partners will ensure FON in Malacca Straits.
3. Gol and its partners will restore order to Sumatra and regain IND sovereignty.
4. NATO is here to support/enable and build capabilities of IND.
5. NATO is here to enable/support all regional partners and enable IHL, HA etc.
6. NATO has a credible and capable force and can react to any threat in the region.

COA2– STRATCOM Audience & Key Message

J5

Key Factors: Objective, Unity, Enablement, Economy of Force

1. NATO and Gol have the will and ability to respond decisively to any threat.
2. IRS are aligned with terrorist groups and are NOT recognised by the IC.
3. NATO and Gol will restore order to Sumatra and regain IND sovereignty by all means available.

Risk of loss of support of Local Population & Key Leaders. Potential increased tensions with China and potential risk of withdrawal of regional partners

*Counter likely loss of support by an extensive pro NATO (and Gol) influence campaign incorporating a coordinated **CPRO/CPO***

OPERATIONAL TIMELINE COA 1

COA 1 Phases:

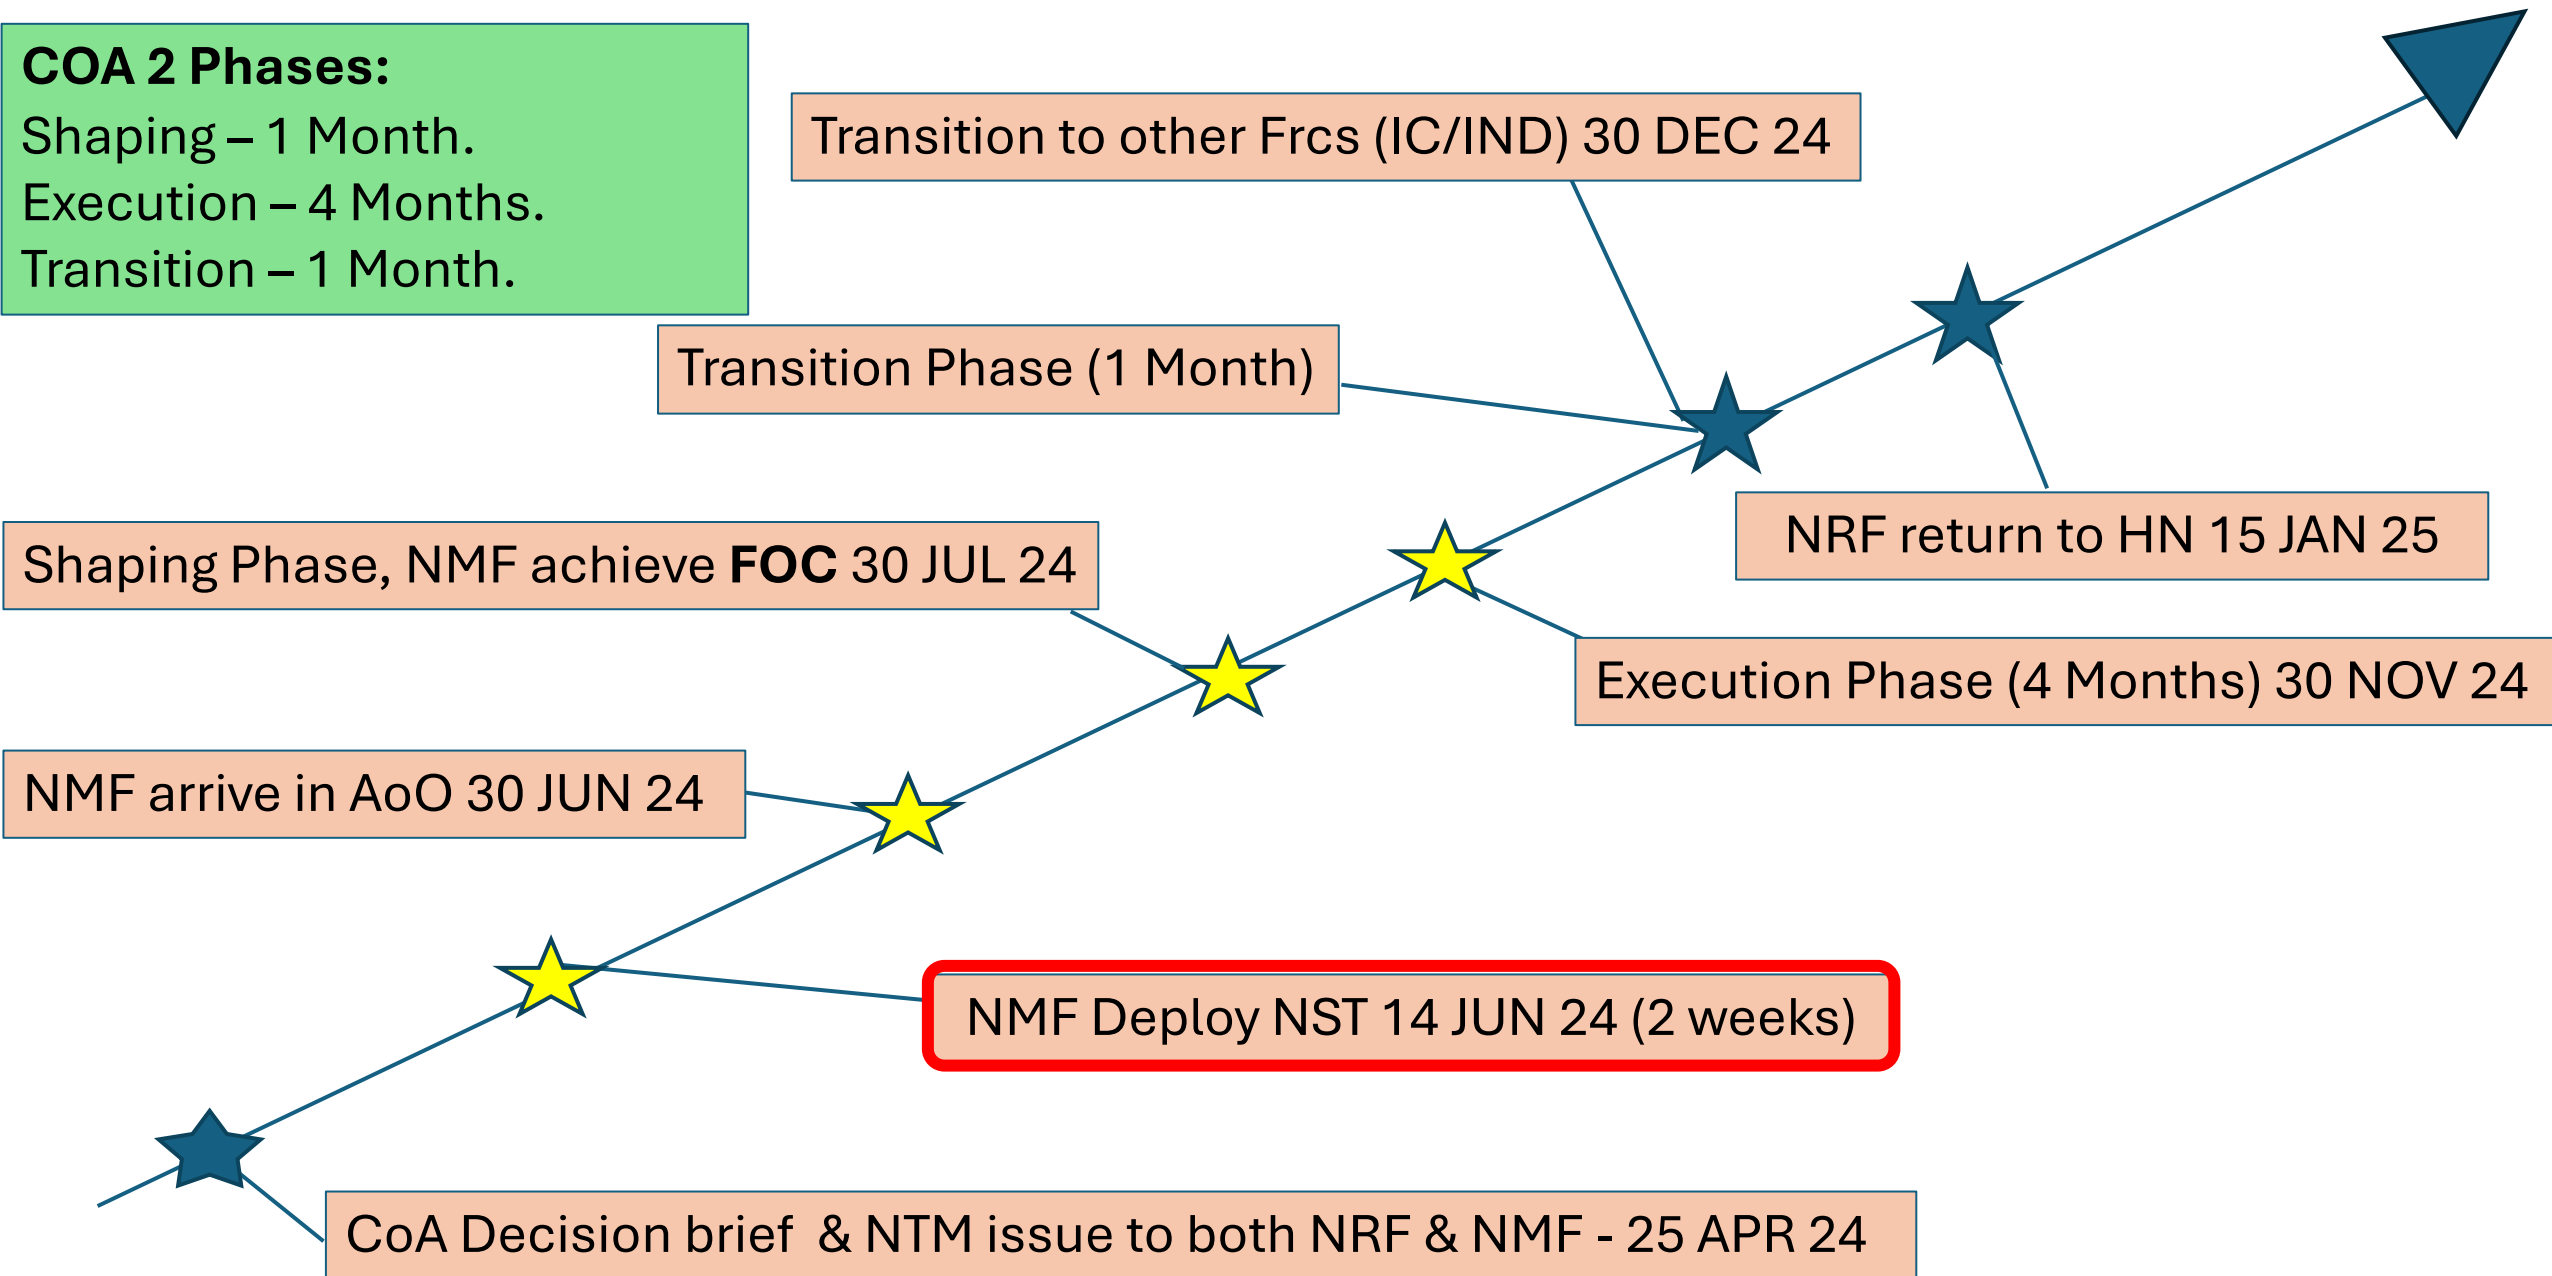

Shaping – 1 Month.
Execution – 4 Months.
Transition – 1 Month.

OPERATIONAL TIMELINE COA 2

COA 2 Phases:

Shaping – 1 Month.
Execution – 4 Months.
Transition – 1 Month.

LOGISTICS SUPPORT – COA1

INITIAL DEPLOYMENT OF NRF					
Classes of Supply	Stock Levels (Days of Supply)			Sustainment Support (Nat, HNS, CSO, MN, Lead Nation...)	Remarks
	1st Line (Unit Level)	2nd Line (Support Formation)	3rd Line (TLB/JLSA/NSE)		
Class I Food and Rations	15	30	60	Host Nation Support	Bottled water will be required
Class II Clothing, weapons, tools, spares, vehicles	5	20	60	National	Transport to theatre to be coordinated to ensure efficiency
Class III Non-Aero POL	20	30	60	Lead Nation	Water temperatures between 26C and 29C. (Summer Grade fuels year round)
Class IIIa Aero POL	20	30	60	Host Nation Support	HNS supply to mitigate maritime requirements
Class IV Construction Materials	0	0	30	Host Nation Support	
Class V Ammunition, explosives, agents	15	30	60	Lead Nation	

LOGISTICS SUPPORT – COA1

6b

J5

LOGISTICS SUPPORT – COA2

LOGISTICS SUPPORT – COA2

FOLLOW ON DEPLOYMENT OF CJTF					
Classes of Supply	Stock Levels (Days of Supply)			Sustainment Support (Nat, HNS, CSO, MN, Lead Nation...)	Remarks
	1st Line (Unit Level)	2nd Line (Support Formation)	3rd Line (TLB/JLSA/NSE)		
Class I Food and Rations	7	15	30	Host Nation Support	Bottled water will be required
Class II Clothing, weapons, tools, spares, vehicles	3	10	60	National	Transport to theatre to be coordinated to ensure efficiency
Class III Non-Aero POL	15	30	100	Lead Nation	Water temperatures between 26C and 29C. (Summer Grade fuels year round)
Class IIIa Aero POL	7	30	100	Host Nation Support	HNS supply to mitigate maritime requirements

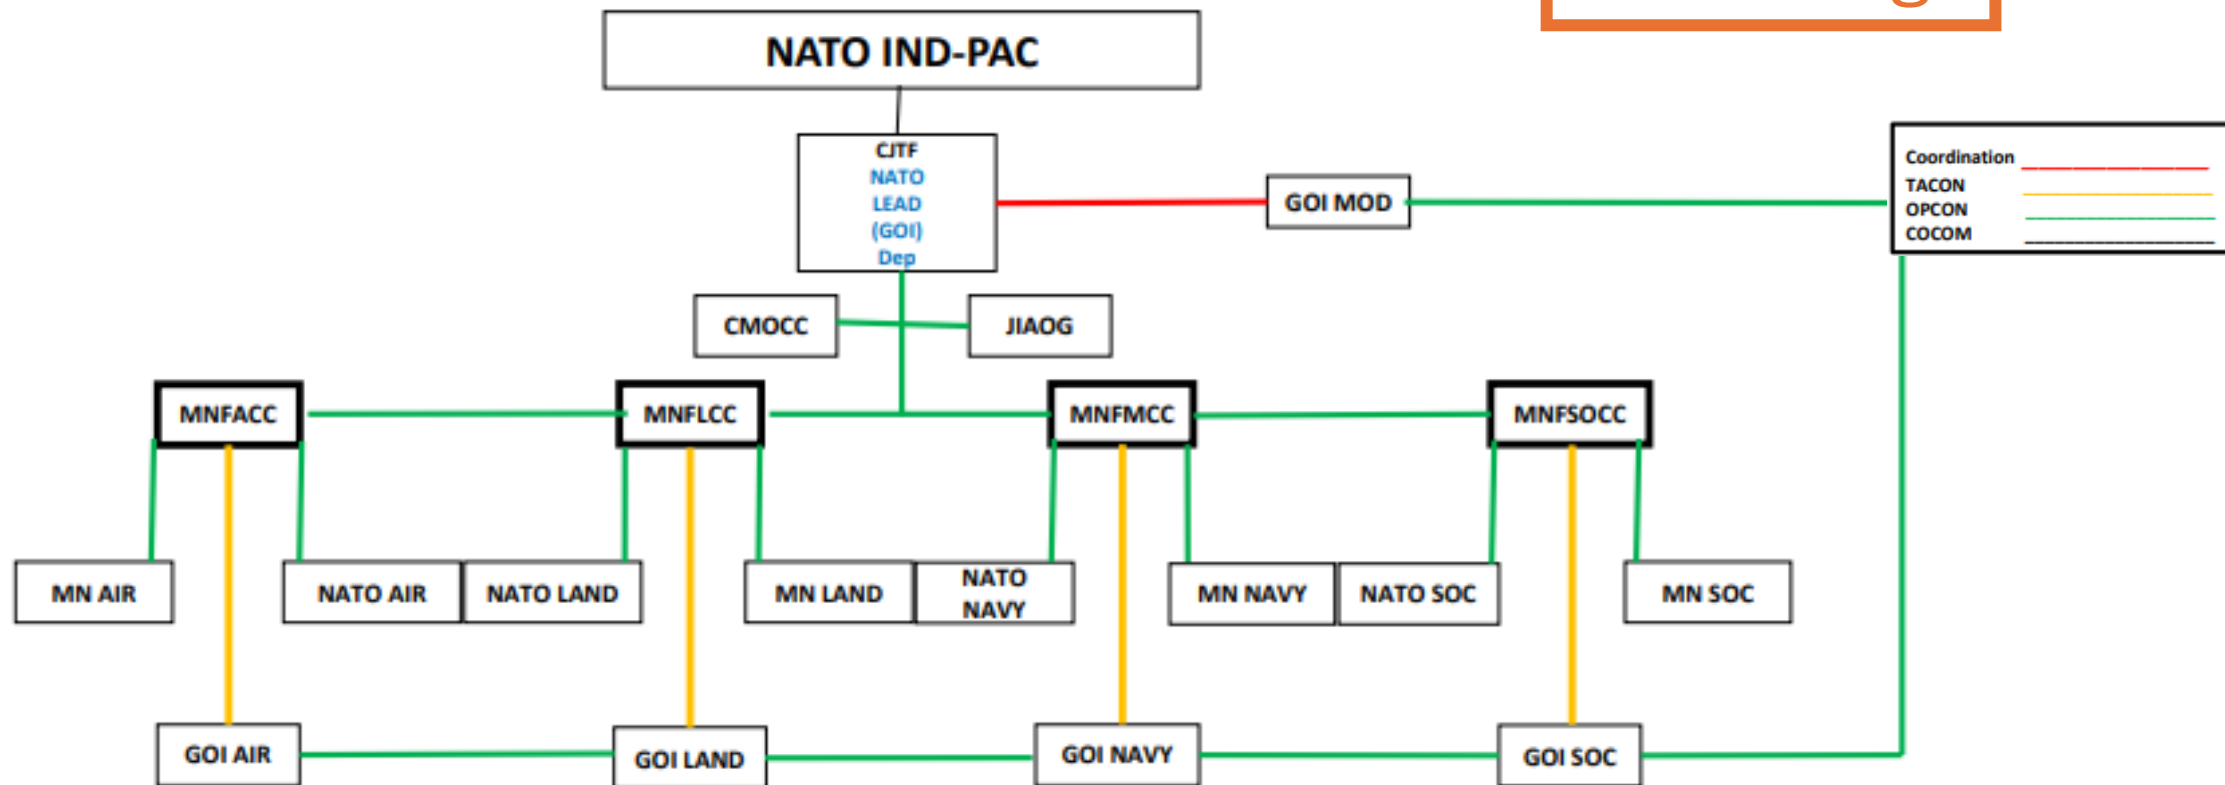

So What:

LOGISTICS concept is appropriate to the sustainment required for planned operations – COA 1 & COA 2

Command and Control

No Change

J5

Preliminary C2 Arrangements.

- SACEUR will retain overall strategic command for the operation.
- CJTF will be delegated OPCON of deployed forces.
- COM CJTF will exercise C2 through the CCs with liaison to GOI MOD.
- Nations will delegate OPCON to COM CJTF not later than arrival in the JOA.
- National Support Elements within the JOA, including National Intelligence Cells, will operate under COM CJTF as coordinating authority.

COA Comparison and Recommendation

Commanders Criteria	Weight	COA 1 – Light		COA 2 - Heavy		Remarks
Objective	3	5	15	5	15	Both achieve OBJs
Unity	1	4	4	3	3	COA 1 enables IND
Economy of Force	2	4	8	3	6	COA2 Larger Commitment of forces
Totals			27		24	

So What:

- **Distinctly different but viable COAs designed to accomplish our objectives via different means.**
- **FoN Straits of Malacca common to both.**
- **COA 1 focuses on enablement and support to IND through Influence and Training.**
- **COA 2 focuses on aggressive support posture and influence on IND.**
- **Depending on the situation, COA 1 may naturally evolve into COA 2 (MNR remain on S/By).**

Way Ahead
