**SUBJECT: JOINT LOGISTIC SUPPORT GROUP HEADQUARTERS (JLSG HQ)
IMPLEMENTATION INSTRUCTION**

REFERENCES: A. MC 586/1, MC Policy for Allied Forces and their Use for Operations, dated 13 June 2012.
B. Bi-SC Conceptual Framework for Alliance Operations (CFAO), dated 11 June 2013.

1. Background. In 2006, NATO adopted the Joint Logistic Support Group Headquarters (JLSG HQ) as the mechanism for providing theatre level multinational logistic support for NATO operations. The JLSG HQ was then established in the Force Command Headquarters in Heidelberg and Madrid where it has subsequently been employed on exercises and operations. The disbandment of the Force Command Headquarters and the advent of the new NATO Command Structure (NCS), with the attendant increased reliance on the NATO Force Structure (NFS) for the generation of joint command and control (C2) capabilities, necessitate adoption of a common approach to implementation of the JLSG HQ in both the NCS and NFS.

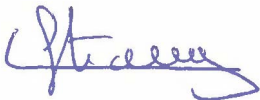

2. Collaborative Development. Acknowledging the need for a common approach to the adoption of a JLSG HQ in the NCS and NFS, SHAPE J4 was tasked to develop an instruction to facilitate JLSG Implementation. In 2012 SHAPE J4 staff commenced work to develop an implementation instruction in conjunction with logistic staff from NATO HQ, the JFC HQs, Component Commands, HRF(L) HQs, JWC, NSPA and Nations. Four workshops were held throughout 2012 to develop and refine the instruction, which was then updated in light of lessons identified by HQ ARRC during Ex STEADFAST JUNCTURE 2012. In early 2013 the revised version of the instruction was promulgated to national logistic staff for review, via the NATO Logistic Committee Executive Group (LCEG). The Instruction has therefore been endorsed by all the NCS and NFS entities involved in developing the document.

3. Ongoing Staffing. Notwithstanding wide spread support and endorsement for the Instruction there are inevitably aspects of the document that will require further refinement. These include: revision of the Augmentation approach in view of the current SHAPE J1 work to identify augmentation requirements and options; further analysis of the JLSG CIS requirements

and potential support options; and, development of the Training approach to ensure it is consistent with, and exploits the joint training opportunities being considered as part of the Connected Forces Initiative (CFI). The SHAPE J4 staff will continue to work on these issues, in conjunction with the respective stakeholders.

4. Purpose. The purpose of the JLSG HQ Implementation instruction is to describe how the NCS and NFS Joint Headquarters (JHQ) will prepare, train and deliver a JLSG HQ in support of NATO operations and exercises in order that there is a common approach to the employment of a JLSG HQ in NATO.
5. Coherence. The JLSG HQ Implementation Instruction is consistent with the guidance in Reference A and complements Reference B, and the respective ACO Directives.
6. Applicability. This Instruction is applicable to those NCS and NFS Headquarters providing Joint Command and Control Capability (JC2C) support for NATO operations. The Instruction is based on a preparation, training, certification and stand-by regime that is, as far as possible, based on, and aligned with, that already established for the NATO Response Force (NRF).
7. Review and revision. The JLSG HQ Implementation Instruction will be reviewed and revised, by SHAPE J4, as and when required. Updates are authorised and issued when approved by the DCOS Resources, SHAPE.
8. Proponent. The proponent for this directive is SHAPE J4 Logistic Operations and Plans Branch. The SHAPE J4 POC for this Instruction is Lt Col WG Fraser, DSN 423 - 4874, gordon.fraser@shape.nato.int.

Introduction

1. The Alliance employs both NATO Command Structure (NCS) and NATO Force Structure (NFS) headquarters to command and control (C2) operations. However, successive revisions of the NCS have progressively increased the reliance on NFS headquarters to ensure that NATO can deliver the C2 requirements prescribed in the Level of Ambition (LoA). Moreover, the new NCS (Reference A) has been adapted to provide scalable deployable joint C2 for operations ranging from Small Joint Operation (SJO) to Major Joint Operation (MJO) in size. The operational level of command in the NCS is normally exercised by a Commander Joint Command (JFC) supported by the

¹ A new version is to be published in summer 2013.

battle staff from his Joint Force Command, deployed as the Joint Task Force HQ (JTF HQ). The NFS provides complementary additional and follow-on Joint HQ capabilities to enable the Alliance to meet the full LoA (Reference C). As a result, the Graduated Response Force (GRF) Joint headquarters are required to be capable of commanding joint operations of differing scales, as well as providing the capability to replace JTF HQs, and sustain such headquarters for the duration of the mission.

2. One of the key tasks of a Joint headquarters commanding a SJO or MJO is to provide multinational Logistic² Support where required. Accordingly, both NCS and NFS headquarters commanding SJO and MJO are also to be capable of providing a Joint Logistics Support Group headquarters (JLSG HQ). This enables the NATO Commander to fulfil his responsibilities (summarised in Reference B) which are as follows:

- a. The NATO Commander is responsible for establishing the logistic requirements for all phases of an operation, and for the coordination of logistic planning and support within his area of responsibility.
- b. The NATO Commander is responsible for the development and promulgation of a Logistic Support plan that supports the operational plan. This plan must identify the structures and procedures required to reduce competition for scarce resources by nations and NATO Headquarters (HQs) and include, in close cooperation with nations, the implementation of the different modes³ of Logistic Support⁴.

Purpose

2. The purpose of this document is to provide the direction and guidance required to enable implementation of the JLSG HQ in NCS and relevant NFS headquarters in order that the NATO Commander can deliver the appropriate level of multinational Logistic Support for Alliance operations and missions (AOM).

Coherence

3. This document complements and should be read in conjunction with the MC 586/1 MC Policy for Allied Forces and their Use for Operations (Reference C) and the Bi-SC Conceptual Framework for Alliance Operations (CFAO) (Reference D) which incorporates annexes relating to the NCS JTF HQ concept (Annex C) and the NFS JTF HQ Annex D. It is also consistent with References E to G inclusive.

Application

4. The direction and guidance herein applies to those NCS and NFS headquarters that command and control AOM, within resources.

² The term Logistics is used herein to encompass the broad array of functions as defined in AAP-6, including: "design and development, acquisition, storage, movement, distribution, evacuation and disposal of materiel; transport of personnel; acquisition of construction, maintenance, operation and disposition of facilities; acquisition of furnishing of services and medical and health support".

³ Modes include but are not limited to: Lead Nation, Role Specialist Lead Nation, Multinational Integrated Logistic Unit, etc., as detailed in Reference F.

⁴ To also include ashore maritime support via an ALSS/FLS, where required.

Assumptions

5. Nations will make available to NATO the joint headquarters required to command and control SJO (Land Heavy) either as initial entry force, or as a follow on force.
6. NCS and NFS headquarters that command joint operations will provide a JLSG HQ⁵, where required for an operation.
7. The SHAPE Long Term Rotation Plan (LTRP) will provide the mechanism for identifying ACO operational C2 requirements and nominated headquarters.
8. Nations will provide personnel to augment JLSG HQ where requirements exceed resources or where Framework Nations (FNs) are unable to resource requirements.

Outline Logistic Support Concept for NATO Operations

9. Logistic Support for NATO operations is founded on the principle of Collective Responsibility, where NATO and nations collaborate to provide timely, effective and efficient support for the deployed force. Logistic Support must therefore be scalable and will be mission tailored to provide for the requirements of the particular operation.
10. The deployed JTF HQ is responsible for logistic support at the operational and theatre⁶ levels, as agreed with nations. To accomplish this, the JTF HQ has available a functional staff (CJ4, CJ Eng., etc.) and a subordinate JLSG HQ. The JTF HQ functional staffs are responsible to DCOS SPT⁷ for operational planning and assessments, staff advice, risk analysis, prioritisation and synchronisation of functional support, etc. The JTF HQ will task the JLSG and the JTF HQ functional staff will coordinate theatre Logistic Support requirements with the JLSG HQ staff. COM JLSG is responsible to COM JTF for the coordination and execution of theatre level multinational Logistic Support.
11. During the Operations Planning Process (OPP) the JTF HQ will determine the appropriate logistic C2 structure to support the COM JTF intent. The logistic C2 structure may, where required, employ two separate but complementary entities: the JTF HQ functional staff and the JLSG HQ. However, it might also employ a single logistic C2 entity, using personnel from both the JTF HQ functional staff branches and the JLSG HQ, most likely for operations of lower intensity or scale. COM JTF HQ may alter the logistic C2 for an operation, where it is appropriate to do so.
12. Troop Contributing Nations (TCN) are responsible for providing Logistic Support for their forces, under national arrangements. National Support Elements (NSE) will coordinate national theatre level Logistic Support with the JLSG HQ and tactical level Logistic Support with the relevant Component Command headquarters, if they are

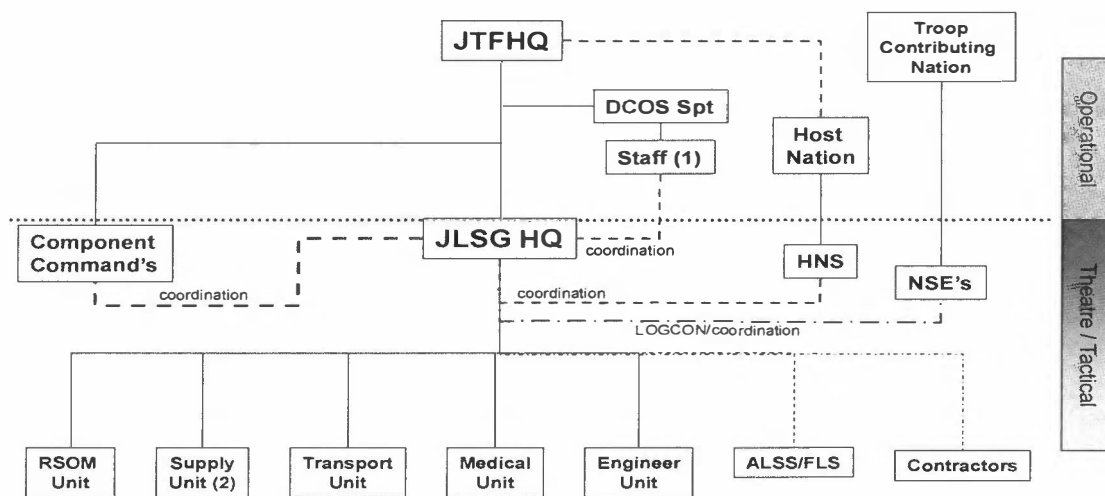

⁵ When a NCS headquarters commands an operation it will provide the JLSG HQ CSE and when a NFS headquarters commands an operation the Lead / Framework nation(s) will provide the JLSG HQ CSE.

⁶ The term theatre level is used to describe the support provided by the JLSG HQ in support of nations in accordance with the JTF HQ OPLAN that is known by some nations as 3rd Level or 3rd Line support. Theatre support typically provides supplies or services of common use to TCN, such as RSOM, fuel supply, role 3 medical support etc.

⁷ Or the senior staff officer in the JTF HQ responsible for 'support' issues.

deployed. To facilitate coordination, the NSEs will typically be collocated with the JLSG HQ, or, when not collocated, will assign liaison officers to the JLSG HQ.

13. Notwithstanding that there are a variety of structural options available to COM JTF, a generic logistic C2 model, based on a MJO scenario, is provided for illustrative purposes at Figure 1.

Note:

1. Functional staff, i.e. CJ4, CJ8, CJ Eng.
2. For example, fuel, water, food, etc.

Figure 1. Generic deployed Logistic C2 model.

JLSG Functions, Roles and Tasks

14. Delineation of Functions. Annex A lists the probable generic functions of the JTF HQ functional staff and the JLSG HQ staff. The table is provided for guidance and will be applied on operations as appropriate where functions will be allocated by the appropriate staff to satisfy and complement the operational requirement, and to ensure consistency with the selected logistic C2 structure.

15. JLSG Function. COM JLSG is responsible to COM JTF for the coordination and execution of theatre level multinational Logistic Support (intra theatre transport, contract management, role 2/3 medical support, RSOM⁸, military engineer support, etc) in accordance with the JTF HQ logistic plan and guidance.

16. JLSG HQ Tasks. A list of the key JLSG HQ tasks is contained at Annex B.

JLSG Structure and Organisation

⁸ Reception, Staging and Onward Movement (RSOM).

17. JLSG Structure. The JLSG consists of three elements that will be mission tailored for specific operations: :

- a. JLSG HQ Core Staff Element (JLSG HQ CSE). The JLSG HQ CSE provides the nucleus of the JLSG HQ and consists of personnel⁹ organic to the headquarters providing the JTF HQ. The JLSG HQ CSE supports operational planning, provides personnel to the Operational Liaison and Reconnaissance Team (OLRT¹⁰) and planning for the execution of theatre level multinational Logistic Support (RSOM etc).
- b. JLSG HQ Augmentation. The JLSG HQ CSE will typically be augmented by additional personnel¹¹ to enable the JLSG HQ to execute theatre level multinational Logistic Support. The JLSG HQ will be mission tailored for provide for specific operations.
- c. JLSG Units. The JLSG will be assigned national, Host Nation (HN) units, and/or commercial entities to enable it to execute theatre level multinational Logistic Support¹². These units or entities will be identified during the OPP and assigned during the Force Generation process. The units may be provided by the FN or a Role Specialised Nation (RSN) but where this is not possible they should be provided by TCN using the principle of 'proportionality', in which each TCN contributes capability relative to the total size of its deployed joint force.

18. JLSG Structure. A generic JLSG structure is shown at Annex C.

19. JLSG HQ Manning. Details of the JLSG HQ manning and appointments are at Annex D.

20. JLSG HQ Augmentation. Augmentation personnel are required to enable a JLSG HQ CSE to grow into a complete JLSG HQ capable of executing Logistic Support for operations. The JLSG HQ augmentation personnel should be identified during the Global Force Generation Conference and are required to train, prepare and deploy with the JLSG HQ CSE and the JTF HQ. The augmentation approach, summarised in Annex E, will be different for NCS and NFS headquarters due largely to NRF readiness requirements and because support requirements differ between SJO and MJO. COM JTF is responsible for coordinating augmentation and training with the providing entities¹³. The augmentation approach to be adopted is as follows:

- a. NCS JLSG HQ. Augmentation will comprise two entities:

⁹ A NCS JLSG HQ CSE consists of 25 personnel. NFS HQs should adopt a similar JLSG HQ CSE structure.

¹⁰ The JTF HQ may deploy an OLRT that includes JLSG HQ CSE staff, or the JLSG HQ could deploy a separate Joint Logistic Reconnaissance Team (JLRT), depending upon the operation.

¹¹ A JLSG HQ typically consists of up to 95 personnel.

¹² This will typically consist of functional units, i.e. a transport unit, a supply unit, movement control unit, fuel supply unit, cargo transfer units, contractors, etc.

¹³ SHAPE will support the JFCs with to identify augmentation personnel.

- i. The NFS HQ designated on the LTRP as the Land Component Command (LCC) will provide staff to the NCS JLSG HQ as agreed with the respective JFC and nations in advance.
 - ii. The balance of the augmentation personnel will be provided by TCN, using a proportional contribution approach, based upon the size of the national contribution to the operation. Because the JLSG HQ CSE can not prepare and train augmentation staff during the OPP, nations are required to nominate personnel during the Global Force Generation process and ensure that the named individuals train, prepare and are certified alongside the JLSG HQ CSE.
- b. NFS JLSG HQ. Augmentation for NFS JLSG HQ will be provided by either the FN or where this is not possible, by TCN personnel using the proportional contribution approach described above. The supported NFS JLSG HQ will coordinate augmentation and training requirements with the respective nations.
 - c. NSPA. NSPA will provide two staff to the JLSG HQ during the preparation, training and standby period.

21. C2 of Logistic Resources. The operational commander is responsible for logistic planning and management in support of the force, as agreed with nations. Nations will therefore need to provide the operational commander with the required capabilities and the necessary authority. This includes authority to plan, coordinate, prioritise and deconflict logistic operations in the JOA. The JTF HQ functional staffs are responsible for operational planning and assessments, staff advice, risk analysis, and the prioritisation and synchronisation of functional support. The JLSG commander is responsible to the operational commander for the C2 of the logistic resources assigned to the JLSG in order to coordinate and execute theatre level logistic support using assigned national, Host Nation and/or commercial resources. To accomplish this, all assigned logistic units at the theatre level, not organic to tactical level formations, should be provided to the operational commander under the same level of control as the combat forces. Where this is not possible, LOGCON¹⁴ (see Annex A) is the minimum C2 authority that should be employed.

22. JLSG Deployment. The JLSG HQ will be at the same Notice to Move (NTM) as the superior headquarters. The JLSG will typically deploy in a phased manner in coordination with the superior headquarters in order to establish the conditions required

¹⁴ Logistics Control (LOGCON) is "That authority granted to a NATO Commander over assigned logistics units and organisations in the JOA, including National Support Elements (NSE), that empowers him to synchronise, prioritise, and integrate their logistics functions and activities to accomplish the joint theatre mission. It does not confer authority over the nationally-owned resources held by an NSE, except as agreed in the Transfer of Authority or in accordance with the NATO Principles and Policies for Logistics."

to ensure timely delivery of multinational Logistic Support. The JLSG deployment will employ the following approach¹⁵:

- a. Reconnaissance and Liaison. The JLSG HQ CSE will provide personnel to the OLRT/JLRT to gather information to support the OPP and development of the COM JLSG SUPLAN.
- b. Coordination. The remainder of the JLSG HQ CSE staff will typically deploy, shortly after the OLRT/JLRT, to coordinate support with the Host Nation (HN) and other actors in theatre and establish the conditions for RSOM and initial Logistic Support. Augmentation personnel must be available to deploy at the same time.
- c. Execution. The balance of the JLSG HQ and units will where required deploy prior to the deployment of the force main body commences in order to support the RSOM for the force.
- d. The trigger for the deployment of JLSG personnel or units undertaking coordination and execution functions will depend on the nature of the operation but will typically be ACTPRED.

Implementation

23. Standardisation. To provide a responsive and adaptive theatre level logistic capability to support SJO and MJO both NCS and NFS JLSG HQ are, as far as is practicable, to adopt the same structures, systems, processes and procedures. This will produce benefits in terms of interoperability and readiness.

24. Job Descriptions. Generic JLSG HQ Job Descriptions have been developed and published on the SHAPE J4 WISE page. The Job Descriptions require refinement and this will be led by SHAPE, in cooperation with the respective JLSG HQ staff. SHAPE will retain control of the Job Descriptions and they will be subject to annual review and revision. Both NCS and NFS JLSG HQ CSE are to use the SHAPE approved Job Descriptions, as far as is practicable.

25. Standard Operating Procedures (SOPs). Generic JLSG HQ SOPs have been developed and published on the SHAPE J4 WISE page. The SOPs require some refinement and this will be led by SHAPE, in cooperation with the respective JLSG HQ CSE. SHAPE will retain ownership and control of the SOPs which will be subject to annual review and revision. Both NCS and NFS JLSG HQ CSE are required to use the SHAPE approved SOPs, as far as practicable. Where required NCS and NFS JLSG HQ may develop their own Standard Operating Instructions (SOI), which are to be consistent with and complement the JLSG HQ SOPs.

26. Training Guidance. Training of the JTF HQ and JLSG HQ is to be undertaken in accordance with the requirements specified in ACO Forces Standards Volume V – Joint

¹⁵ This approach is consistent with the draft NCS JTF HQ model of an OLRT, Forward Coordination Element (FCE), Initial Command Element (ICE) and full JTF HQ.

Headquarters (Reference H). The document covers the Main Capability Areas (MCA) and all aspects of headquarter operations, including the NRF.

27. Training Model. The training approach to be used for the JLSG HQ is summarised in Annex F. The training philosophy is based on a graduated progressive development approach that complements the JTF HQ training and preparation process and delivers a JLSG HQ able to function in a joint and multinational environment. The training priority is: (1) JLSG HQ CSE personnel; (2) JLSG HQ Augmentation personnel; and, (3) collective JLSG HQ training. The JLSG HQ training approach is summarised as follows:

- a. Step 1 - Functional Area Training and Evaluation (FATE). Induction and refresher training of personnel should comprise:
 - i. Training of JLSG HQ CSE personnel is the responsibility of the respective superior headquarters.
 - ii. Training is to be conducted in accordance with respective Job Descriptions and JLSG SOPs.
 - iii. Functional courses at the NATO School Oberammergau¹⁶ such as the NATO Logistic Course, Movement & Logistic Operational Planning Course, JOPG Comprehensive Operations Planning Course, Host Nation Support course, etc, for relevant staff.
 - iv. Training of JLSG HQ augmentation staff is the responsibility of the respective superior headquarters or nation, in coordination with the supported JLSG HQ CSE staff. Augmentation personnel are required to possess the experience and skills set out in the Job Description and to participate in the training activities and the certification event specified by the supported JLSG HQ CSE. It is anticipated that an Advanced Distance Learning (ADL) package will be developed and made available on the NATO School Oberammergau (NSO) website to introduce NATO personnel to the JLSG HQ.
- b. Step 2 – Functional System Training (FST). Induction and refresher training for individuals should, as a minimum, comprise:
 - i. NATO LOGFAS courses appropriate to the Job Description, such as those conducted by the NATO CIS School, i.e. ADAMS, EVE, CORSOM, LOGREP, etc.
 - ii. The TOPFAS course, where required.
 - iii. Augmentation personnel should have a working knowledge of the relevant LOGFAS application.
- c. Step 3 - Collective JLSG HQ Training. The designated JLSG HQ, including augmentation staff, should undertake the following, as appropriate:
 - i. OLRT training as required.

¹⁶ Also applies to appropriate courses conducted at NATO Centre's of Excellence, etc.

- ii. Academics. Briefings and syndicate work on JLSG HQ functions, roles and tasks, etc.
 - iii. Key Leader Training¹⁷. For COM and COS JLSG as required.
 - iv. BST. To practise JLSG HQ procedures.
- d. Step 4 - Collective JTF HQ Staff Training. The staff from the JTF HQ, CC and JLSG HQ should participate in the following, as appropriate:
- i. Academics. Briefings and syndicate work on JTF HQ operations.
 - ii. Key Leader Training. For COM and COS JLSG as required.
 - iii. BST. To practise operating in a joint environment with other deployable headquarters.
 - iv. JTF HQ Exercise. All personnel should participate in a JTF HQ exercise.
- e. Certification Event. All JLSG HQ personnel should participate in the Certification event with the designated JTF HQ. This will typically take the form of a CPX/FTX.
- f. Step 5 – Continuation Training. Where possible during the Standby period the JLSG HQ should conduct additional functional training to mitigate skill fade, especially for augmentation staff.
28. Certification. Certification of JTF HQ and JLSG HQ will be undertaken in accordance with ACO Forces Standards Volume IX – Evaluation of Joint Headquarters (Reference I). SHAPE J7 – Evaluation Branch will coordinate the Certification event with the relevant headquarters.
29. NCS – NFS JLSG HQ Affiliation. In order to leverage the skills and experience and build competency, it is intended to establish affiliations between NCS and NFS JLSG HQ CSEs. The affiliation mechanism will be confirmed once the ACO Regional Focus work is complete.
30. CIS. NATO CIS and NATO deployable CIS (DCIS) will be provided based on operational requirements validated by SHAPE, in accordance with NATO eligibility rules. The provision of NATO functional services will be validated by SHAPE against the functional services baseline and available resources and capabilities. NATO common funded DCIS will provide “through and to” connectivity for the JLSG HQ in accordance with the principles set out in MC 593/1 (Reference J). As a general rule, the JLSG, typically located in a Theatre Logistic Base (TLB) can expect to be provided with sufficient DCIS to connect to the JTF HQ and component headquarters, two Ports of Disembarkation and a forward logistic base. Additional DCIS may be made available to the JLSG to provide for operation specific requirements, if available. Nations are responsible for providing the CIS connectivity from subordinate units to the JLSG HQ.

¹⁷ The term Key Leader training is used to denote the training of JLSG HQ command group and key personnel, i.e. COM, COS, etc. COM JLSG will identify the key posts.

31. Logistics Information Systems.

- a. LOGFAS¹⁸. LOGFAS is to be used for all logistic planning, coordination and reporting¹⁹. JLSG HQ personnel are to be trained on those LOGFAS applications applicable to their Job Description prior to deployment, especially ADAMS, EVE, CORSOM, etc.
- b. Logistic Reporting. Logistic Reporting is to be undertaken in accordance with ACO Directive 80-3 – Logistics Reporting.
- c. Recognised Logistic Picture (RLP). The JTF HQ staff will define the theatre RLP requirements for a particular operation. The JLSG HQ is responsible for providing and maintaining the RLP, using NATO Functional Services applications.

32. Real Life Support (RLS). The JLSG HQ may or may not be collocated with the JTF HQ. Where collocated, the JTF HQ will provide RLS for both entities. Where the JLSG HQ is not collocated with the JTF HQ, the JTF HQ is responsible for making the necessary RLS arrangements for the JLSG HQ.

33. Force Protection (FP). FP for the JTF HQ and JLSG is expected to be Force Generated for the specific operation. The JTF HQ is responsible for coordinating FP arrangements for the JLSG and the JLSG HQ will command assigned FP units.

34. NATO Support Agency (NSPA). Given the increasing use of contract support for operations it is probable that the JLSG will be required to manage some NATO funded contracts. The NATO Theatre Head of Contracts (THOC) will typically be located in the JLSG HQ where he is likely be supported by staff from NSPA, who can provide advice during the OPP and support once deployed. NSPA may also act as the Host Nation, executing NATO contracts, where required by the respective NATO committee.

35. NATO Common Funding. Reference K and L articulate the NATO policy regarding entitlement to NATO Common Funding.

36. Strategic JLSG Coordination. SHAPE J4 will convene an annual JLSG conference to review JLSG lessons identified, Job Descriptions, SOPs etc and take forward remedial action as appropriate. NCS and NFS staff will be invited to the conference.

¹⁸ Logistic Functional Area Systems (LOGFAS). In the future LOGFAS will be replaced by Logistic Functional Services (Log FS).

¹⁹ LOGFAS should also be used by NSEs and national staffs to facilitate timely and effective logistic coordination.

Annexes:

- A. Logistic Functional Responsibilities.
- B. JLSG Task List.
- C. JLSG Organisation.
- D. JLSG HQ Manning.
- E. JLSG HQ Augmentation model.
- F. JLSG HQ Training model.
- G. Abbreviations.

LOGISTIC FUNCTIONAL RESPONSIBILITY

1. AJP-01(D) notes that “The distinction between the military strategic, operational and tactical levels of joint operations will seldom be tidy” (para 0117). It goes on to describe control as: “...the authority exercised by a commander. It can be described (but not defined) as the process through which a commander, assisted by his staff, organises, directs and coordinates the activities of the forces assigned to implement orders and directives” para 0605,b. It also notes that: “The execution of control is shared between the commander and his staff” (para 0602). Given this it is clear that there must necessarily be collaboration and interaction between the JTF HQ functional staff and the JLSG HQ staff. While it is not always possible to be prescriptive about the delineation of responsibility between these two entities, the following is provided as guidance and ought to be applied, as appropriate, for specific operations.
2. The JTF HQ functional staffs (CJ4, CJ Eng, etc) are responsible for operational level planning, monitoring support and providing direction and guidance as required.
3. The JLSG HQ shall ‘employ allocated forces to conduct military tasks’ in accordance with COM JTF HQ OPLAN, and will coordinate logistic issues with the JTF HQ functional staff as and when required. The JLSG HQ will develop Supporting Plans when required. SUPLANs will complement the JTF HQ OPLAN.
4. The table below summarises the key tasks undertaken by the JTF HQ functional staff and the JLSG HQ staff.

Serial	Task	Lead	Support	Remarks
1.	Conduct initial operational Logistic planning during OPP	JTF HQ	JLSG	
2.	Delegate responsibility for Logistic Support as required	JTF HQ		
3.	Develop the logistic concept and write the JTF HQ logistic plan.	JTF HQ	JLSG	
4.	Monitor Logistic plans and operations	JTF HQ	JLSG	
5.	Issue orders and provide direction and guidance	JTF HQ	JLSG	
6.	Allocate support resources to subordinate commanders	JTF HQ	JLSG	
7.	Determine Logistic requirements	JTF HQ	JLSG	
8.	Set operational Logistic priorities	JTF HQ	JLSG	Including RSOM and

				Sustainment.
9.	Synchronise operational Logistic Support	JTF HQ	JLSG	
10.	Coordinate and integrate operational Logistic Support with strategic and operational actors	JTF HQ	JLSG	With HN, SHAPE, neighbouring nations etc
11.	Provide overarching functional policy and guidance	JTF HQ	JLSG	All functional staff divisions
12.	Provide Subject Matter Experts (SME) to OLRT	JTF HQ	JLSG	May include functional staff
13.	Command assigned Logistic resources	JLSG		
14.	Execute JTF HQ Logistic plans	JLSG		In concert with NSPA, NSEs, CCs, etc
15.	Establish overarching HNS plan and coordinate with nations	JTF HQ	JLSG	
16.	Coordinate HNS	JLSG		
17.	Develop Multinational Detailed Deployment Plan (MNDDP)	JTF HQ	JLSG	In coordination with the SHAPE AMCC - using Log FS
18.	Coordinate and execute RSOM	JLSG		Using assigned resources
19.	Coordinate and execute theatre level sustainment	JLSG		In concert with NSEs
20.	Define the theatre Recognised Logistic Picture (RLP) for the operation	JTF HQ		
21.	Provide and maintain the theatre RLP	JLSG		
22.	Set intra theatre movement priorities	JTF HQ		
23.	Plan, coordinate and execute intra theatre movement	JLSG		Within resources and in concert with the Component Commands (CC)
24.	Control movement on theatre LOCs	JLSG		In collaboration with HN, NSEs, CC and contractors
25.	Plan and prioritise theatre military engineering support	JTF HQ		
26.	Coordinate FP for logistic installations and facilities	JTF HQ	JLSG	
27.	Execute FP for logistic installations and facilities	JLSG		In the JLSA and within resources

NATO UNCLASSIFIED
Releasable to PfP
(Version 1.0 dated 23 Jul 13)

28.	Plan and prioritise military engineering support for theatre logistics	JTF HQ	JLSG	Including civil aspects as required
29.	Coordinate and execute military engineering support for theatre logistics	JLSG		Including civil aspects as required
30.	Coordinate and execute theatre military engineering support	JTF HQ		COM JTF HQ may also delegate to LCC.
31.	Plan and prioritise theatre medical support	JTF HQ	JLSG	On behalf of COM/CJ3. Only for assets TOA'd to COM. Not all Nations will formally declare Med assets to NATO but will allow use (e.g. RW MEDEVAC).
32.	Coordinate and execute theatre level medical support	JLSG		• For example Role 2E and Role 3 medical facilities/support. • JTF HQ will retain responsibility for Combat Support medical elements such as MEDEVAC, Role 1 and Role 2. These responsibilities lie with COM, HQ Med Ad and CJ3.
33.	Provide overarching contract support policy and guidance	JTF HQ		See note 2.
34.	Authorise commitment of NATO funds to provide contract support, as delegated by the theatre FINCON	JTF HQ		JTF HQ FINCON/IC/BC
35.	Coordinate theatre contract support through the Theatre Allied Contracting Office (TACO)	JLSG		Within resources and in collaboration with HN, NSE,

				CC, and contractors
36.	Control assigned real estate	JLSG		Within resources

Notes:

1. The term Logistics' is used in the broad context as defined in MC 319/2:

LOGISTICS

The science of planning and carrying out the movement and maintenance of forces. In its most comprehensive sense, those aspects of military operations which deal with:

- a. design and development, acquisition, storage, movement, distribution, maintenance, evacuation, and disposal of materiel;
- b. transport of personnel;
- c. acquisition or construction, maintenance, operation, and disposition of facilities;
- d. acquisition or furnishing of services; and
- e. medical and health service support.

2. NATO contracts are subject to NATO Financial Regulations and the responsibility of the ACO Financial Controller which may be delegated to the Theatre Financial Controller. The financial and contract staff assigned to the JLSG are directly accountable to the Theatre Financial Controller for any contracts or agreements having financial implications.

JLSG HQ TASK LIST

The task list provides guidance on key JLSG HQ tasks. AFS Vol V (Reference H) contains a list of the tasks the JLSG HQ should be able to accomplish. Tasks identified with an * are typically the responsibility of the JLSG HQ CSE.

1. Provide functional support and advice to the JTF HQ staff during the Operations Planning Process (OPP), including development of the logistic CONOPS.
2. Provide personnel to the Operational Liaison and Reconnaissance Team (OLRT)*.
3. In coordination with the DCOS SPT (or relevant senior logistic officer in the JTF HQ) staff and nations, identify multinational logistic support options.
4. Coordinate and execute theatre level Logistic Support and enabling functions in accordance with the JTF HQ OPLAN in coordination with NSEs.
5. Exercise command and control of assigned national, Host Nation and/or commercial support resources.
6. Train and integrate JLSG HQ CSE augmentation personnel*.
7. Develop COM JLSG SUPPLAN*.
8. Develop the RSOM plan for the force*.
9. Establish the support and facilities required to provide effective and efficient RSOM for the force.
10. Undertake Key Leader Engagement (KLE) in theatre to set the conditions for theatre Logistic Support.
11. Coordinate Host Nation Logistic Support for operations.
12. Coordinate theatre movement control.
13. Manage Intra Theatre transportation operations.
14. Deliver and manage NATO funded contracts as directed.
15. Coordinate theatre contract operations through the TACO, in collaboration with Component Commands, NSE and NSPA.
16. Plan, organise and prepare augmentation for JLSG HQ CSE*.
17. Train and prepare augmentation personnel to operate in the full JLSG HQ.
18. Provide Liaison Officers (LO) to appropriate headquarters.
19. Receive and support LO from appropriate headquarters and NSE²⁰.

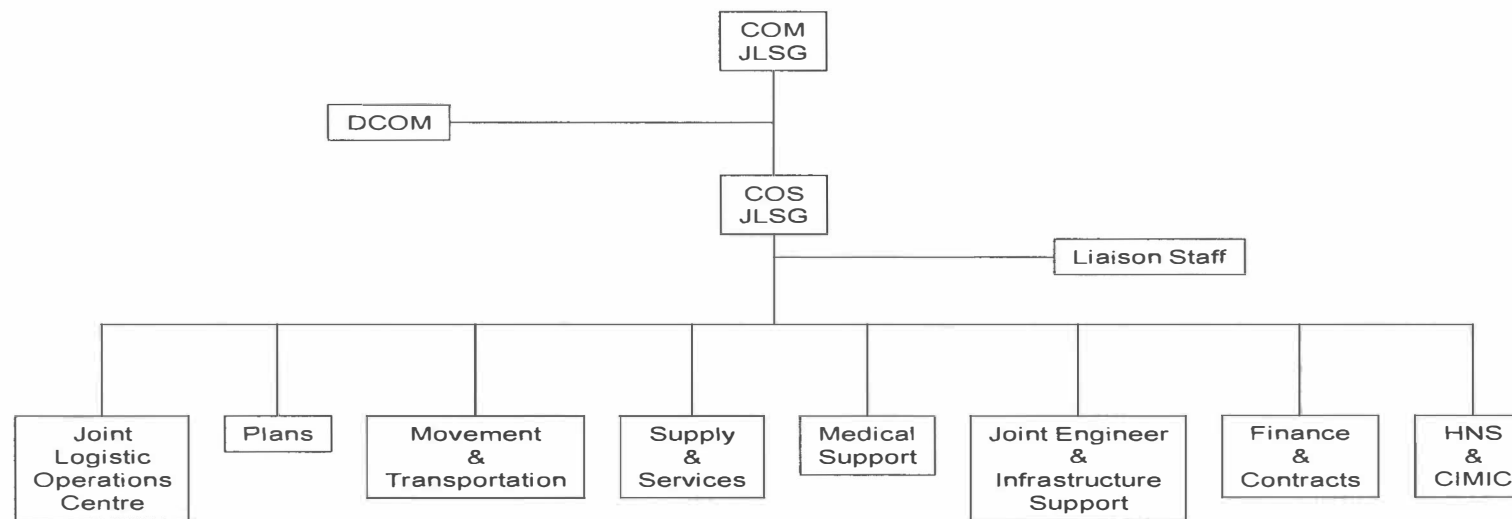

²⁰ NSE's do not need to provide LOs where they are collocated with the JLSG HQ.

NATO UNCLASSIFIED
Releasable to PfP
(Version 1.0 dated 23 Jul 13)

20. Assist with the training and mentoring of affiliated JLSG HQ during the stand-by period.
21. Assist with the certification of the affiliated JLSG HQ during the stand-by period.
22. Provide advice to the JTF HQ staff on JLSG capabilities and operations, as required.
23. Maintain assigned NATO logistic information systems and relevant logistic data.
24. Contribute to the development of NATO logistic doctrine and concepts*.
25. Contribute to the development of NATO logistic information systems, software and information management*.
26. Review and contribute to the revision of JLSG HQ SOPs*.
27. Contribute to the development and implementation of emerging and new NATO logistic capabilities*.
28. Provide staff to support training and exercises at the Joint Warfare Centre (JWC), as required and as agreed with the parent headquarters or nation concerned*.
29. Provide staff to support logistic courses at the NATO School Oberammergau as agreed with the parent headquarters or nation concerned*.
30. Contribute to Military Cooperation tasks, support the NATO Evaluation Programme and contribute to exercises and training with partners, as directed by the superior headquarters*.

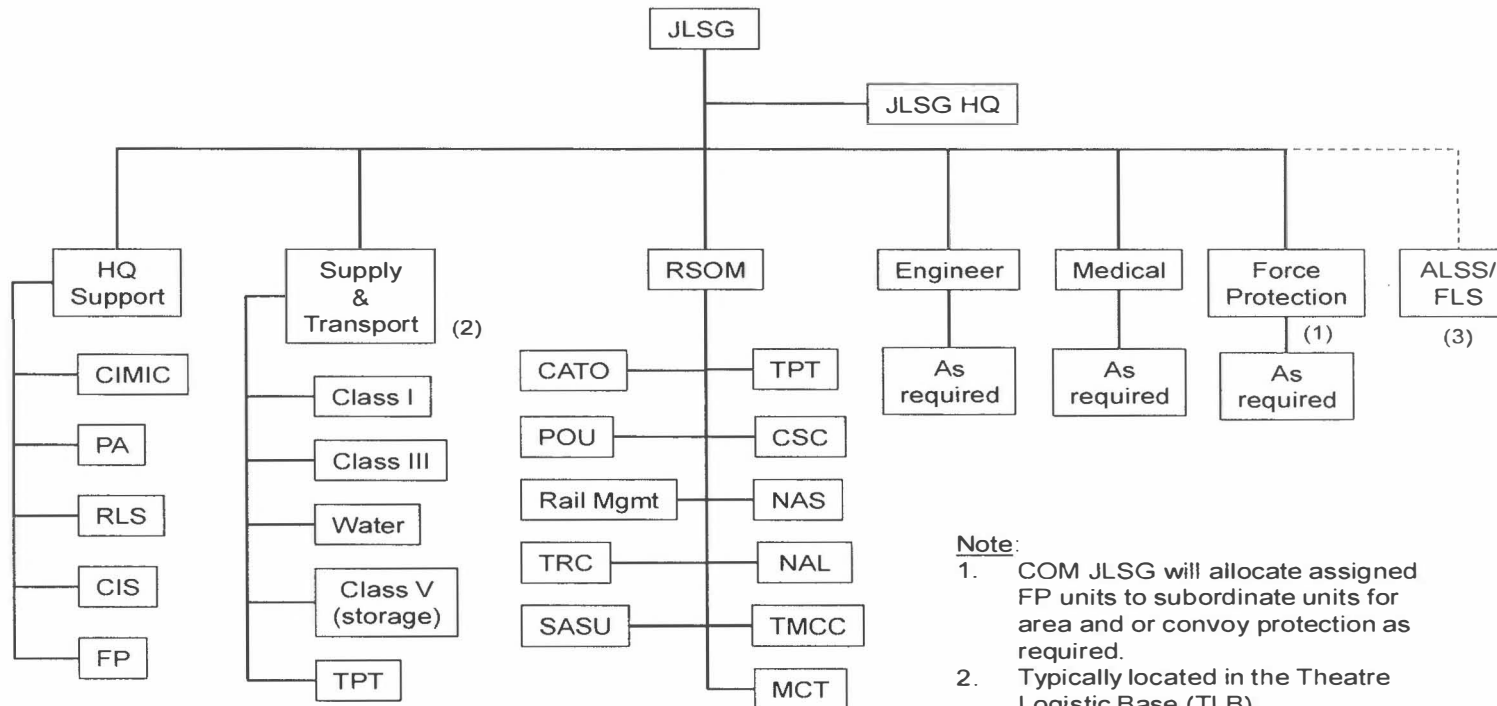

JLSG ORGANISATION

1. JLSG HQ – Generic Organisation

2. JLSG - Generic Organisation.

NATO UNCLASSIFIED
Releasable to PfP
(Version 1.0 dated 23 Jul 13)

- Note:
1. COM JLSG will allocate assigned FP units to subordinate units for area and or convoy protection as required.
 2. Typically located in the Theatre Logistic Base (TLB).
 3. ALSS & FLS may be assigned to JLSG for specific missions by the MCC.

ANNEX D

JLSG HQ MANNING

1. The JLSG HQ is scalable and will be mission tailored to provide for specific mission requirements.
2. The JLSG HQ is a joint entity though the degree to which it is 'joint' will be influenced by the nature of the impending operation.
3. The JLSG HQ establishment will be subject to annual review by SHAPE and may in future be revised in view of lessons identified.
4. The table identifies the JLSG HQ CSE as prescribed in the JLSG HQ SOP 701 and is provided for information.

JLSG HQ AUGMENTATION MODEL

Notes:

1. Provided by the HRF(L) HQ staff that are designated on the LTRP as the LCC in support of the NRF, e.g. NRDC ITA.
2. Based on the % size of the TCN force contribution to the operation.
3. The augmentation manpower requirement for a SJO is anticipated to be less than that required for a MJO.

JLSG HQ TRAINING MODEL

ABBREVIATIONS

Abbreviation	Explanation
ACC	Air Component Command
ACO	Allied Command Operations
ACTPRED	Activation Pre-deployment
ADAMS	Allied Deployment and Movement System
